Leonardo di ser Piero da Vinci
Homo universalis
(1452-1519)

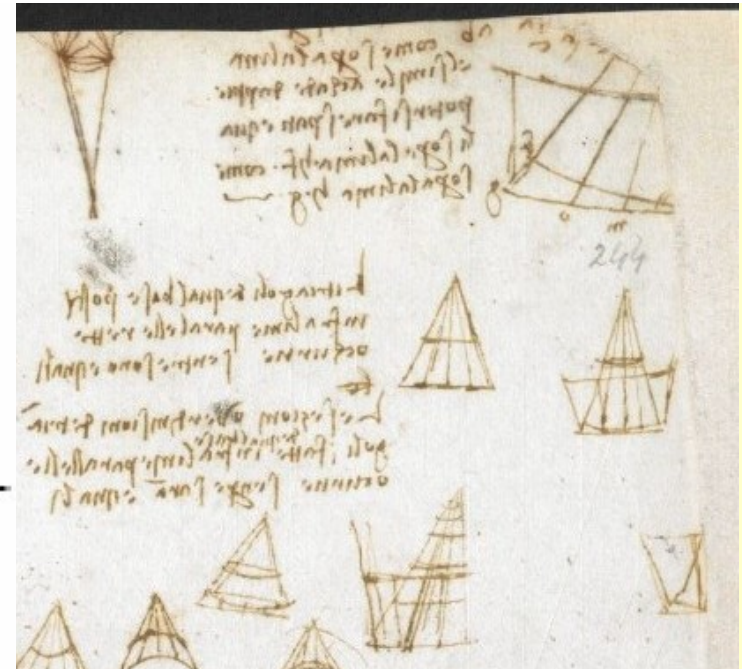

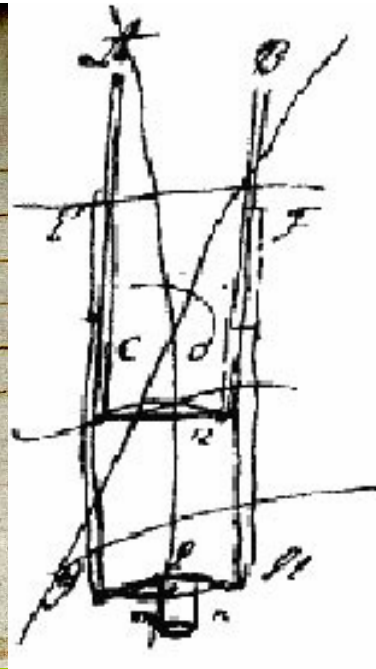

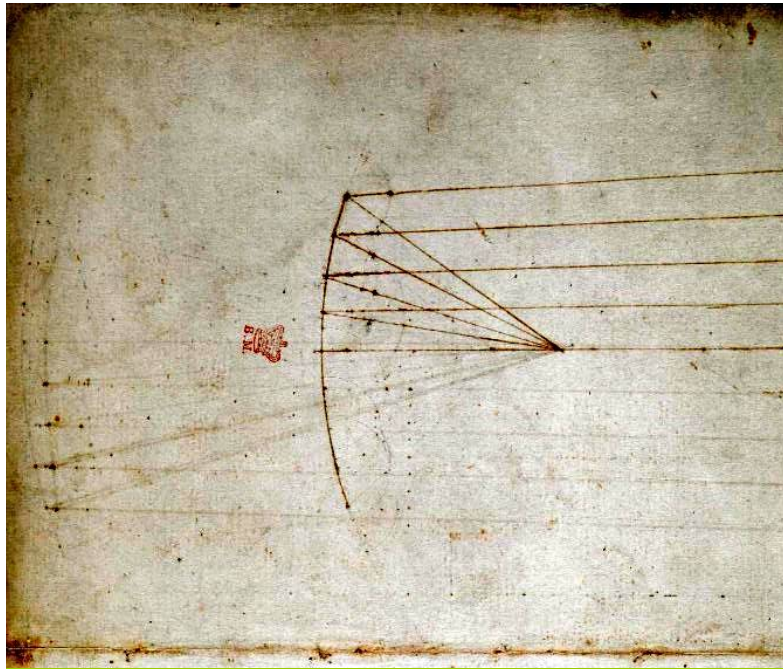

**Who knows
everything,
that may all**

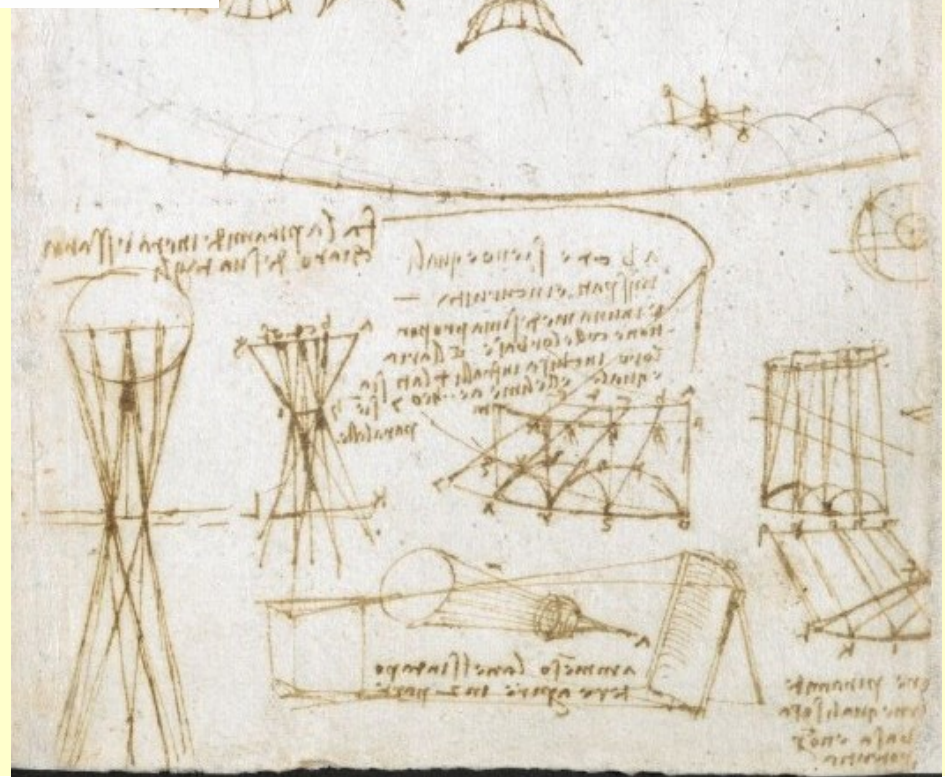

He does not fit in a logical scheme
for the development of science.
Leonardo either unusually overtakes
his era, or lags behind, or goes by. It
is almost impossible to prove his
influence on the further growth of
science. –S. I. Vavilov

Wheel-lock
Колесцовый замок

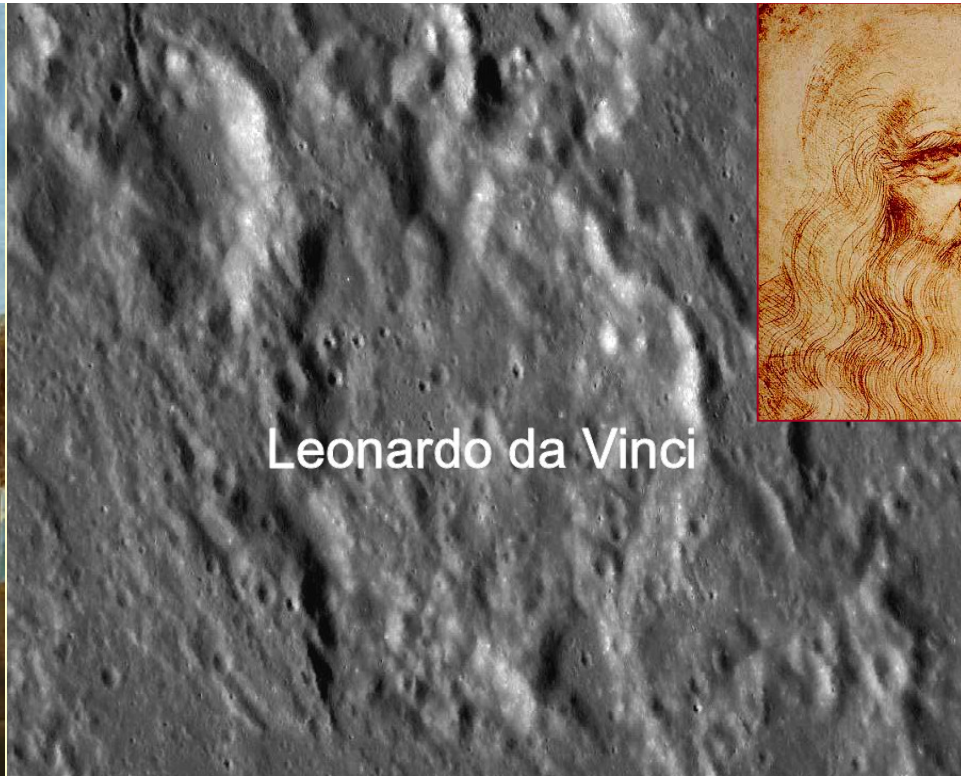

It is possible to find means by which the eye shall not see remote objects as much diminished as in natural perspective... and so the Moon will be seen larger and its spots of a more defined form

- Leonardo da Vinci

Luna-20

Enigma of Soviet mission Luna 23

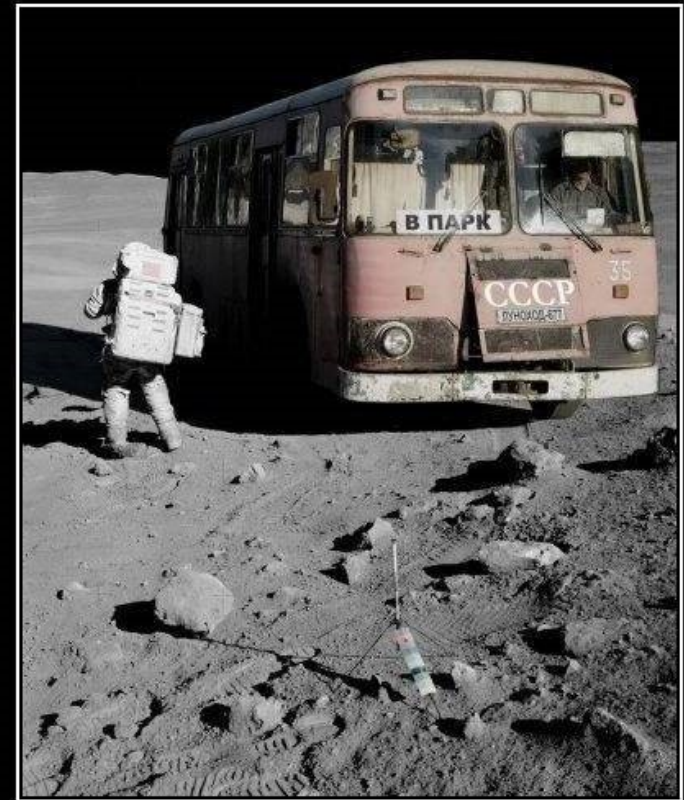

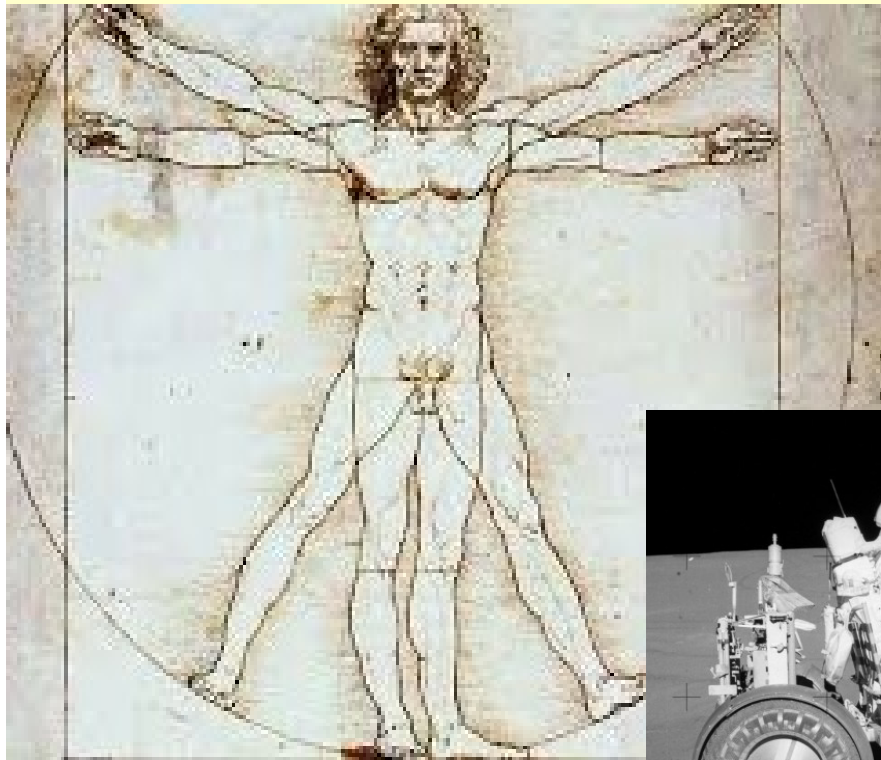

Luna-24 or 23?

Luna-23 or 24?

Who won the Moon race?

The **scientists** who played on the ambitions of politicians won, having managed to force two superpowers to carry out the most expensive space experiment in the history of mankind

ХЬЮСТОН, У НАС ПРОБЛЕМА!
